Ref: Maryland's Public Safety (Docket Number 07-16)

Dear Mrs. Secretary:

As a Captain of the Princess Anne Police Department in Princess Anne, Maryland, I am aware of the problems first responders face with interoperability issues. There is a tremendous need in this county for a single communications platform that all public safety organizations can utilize. My unit, along with the State Police, uses the CapWIN system to communicate; however, the County Sheriff's office operates on another wireless system. In emergency situations, when we need to communicate with one another effectively, we cross this barrier. This is the unfortunate reality that we face.

In respect to this problem, M2Z Networks has placed a docket before your office that would put an end to problems like this one. Docket number 07-1 would provide a seamless data network for the entire county at no cost to the taxpayers. A network of this magnitude would be hugely beneficial to Maryland's public safety officials and the Princess Anne Police Department. I ask that you review this proposal carefully - it will benefit thousands of first responders throughout the nation.

Sincerely,

Scott Keller

Princess Anne Police Department
